ELECTRIC BILLS FOR CUSTOMERS WITH SMART METERS OR NON-COMMUNICATING METERS

Once you receive your smart electric meter or non-communicating meter, your monthly electric bill will look different than it does today.

Previously, your bill showed your "**Total Energy**" use for the billing period.

Previous electric meter usage detail example

| METER READING INFORMATION			
METER	Read Dates: 03/05/21 - 03/12/21 (7 Days)		
DESCRIPTION	**CURRENT READING**	**PREVIOUS READING**	**USAGE**
Total Energy	7153 Actual	7056 Actual	97 kWh

Once you have a smart meter or non-communicating meter, your bill will still show a "**Total Energy**" use row, and it will also include three additional rows labeled "**On-Peak Energy**," "**Mid Pk Energy**," and "**Off-Peak Energy**." As in the past, your bill will be based only on the "**Total Energy**" row. The additional rows show the breakdown of your usage in different time periods and will be used for Time-of-Use rates in the future.

Smart electric meter or non-communicating meter usage detail example

METER READING INFORMATION			
METER	Read Dates: 03/05/21 - 03/12/21 (7 Days)		
DESCRIPTION	**CURRENT READING**	**PREVIOUS READING**	**USAGE**
Total Energy	274 Actual	0 Actual	274 kWh
On-Peak Energy	45 Actual	0 Actual	45 kWh
Mid Pk Energy	18 Actual	0 Actual	18 kWh
Off-Peak Energy	211 Actual	0 Actual	211 kWh

- The Previous Reading field will always display zero.

- The Current Reading field shows how many kilowatt hours you used in the billing period.

- The Usage field will also display the total kilowatt hours you used in the billing period.

If you have set up auto-payments with Xcel Energy, the autopayment will continue and no action is needed.
