

RESOURCE GUIDE

This list is designed to help **contractors identify trusted resources** for issues that may fall outside the scope of your work — including safety hazards, mold, infestations, structural repairs, or accessibility concerns. These organizations provide **free or low-cost support** to income-qualified households and can be shared directly with clients as needed. The CLEAResult Energy Advisors can also help connect customers to resources.

Resource	What It Helps With	Who It's For	Contact / Access Info
